PROFILE

B.Sc. IT graduate (CGPA 8.72) with hands-on experience building full-stack web applications end to end — frontend UI, backend logic, and database design. Comfortable across Python, JavaScript, HTML/CSS, and MongoDB, with a project record of shipping working, deployed applications rather than only coursework. Looking to apply this as a Data Analyst, Web Developer, Python Developer, or Frontend Developer.

TECHNICAL SKILLS

Languages: Python, JavaScript, HTML5, CSS3, OOP Concepts

Web Development: Responsive website design, DOM manipulation, UI/UX layout, cross-browser compatibility

Backend & Data: MongoDB, Database Management Systems (DBMS), data-driven application logic,NoSQL

Tools & Platforms: Git, GitHub, VS Code, MS Office, MS Excel, Windows

PROJECTS

Mall Mapper — *Final Year Project*

- Built a mall-centric e-commerce web application that digitizes the in-store shopping experience, replacing manual mall navigation with a searchable digital directory.
- Designed a category and vendor structure that maps every product to its physical in-mall location, differentiating the app from standard online storefronts.

Inventory Management System — *Minor Project*

- Developed a data-driven inventory management system giving accurate, real-time stock visibility across products.
- Implemented automated analytics to surface stock trends and reduce manual tracking effort.
